

# CIRCULAR

---

**TYPE & NUMBER** ELEXON Circular – EL02791

---

**Date** 6 April 2018  
**To** BSC Parties  
**From** BSC Operations  
**Purpose** For Information

---

## **BSC Systems unable to process declarations of Demand Capacity or Generation Capacity**

### **What is happening?**

Currently BSC Systems are unable to process re-declarations of Demand Capacity (DC) and Generation Capacity (GC) values for Supplier BM Units.

### **How will I be impacted?**

Any DC or GC declarations that have been sent since 29 March 2018 have not been processed. Current DC and GC values, as per the [Registered BM Unit](#) Spreadsheet will be used in Credit Cover calculations. Until this matter is resolved, ELEXON will declare 'Material Doubt' for any BSC Party adversely affected as per Section M of the Balancing and Settlement Code.

### **Is there anything else I need to know?**

We are working to resolve the issue and will send an updated circular when the issue has been resolved.

For more information on this Circular, please email [bscservicedesk@cgi.com](mailto:bscservicedesk@cgi.com).
